

Shaw Technologies, Inc.

Retaining Walls For Any Application

STI Is Your Retaining Wall Company

Unlike many companies, Shaw Technologies has more than one option to any grade separation application. Whether it's a small, backyard garden wall or a Motorway Interchange, we have the ability to provide the system that meets the requirement economically rather than "force" one system for every application.

Typical Systems

Precast panel facing with galvanized steel or geosynthetic soil reinforcement

Block facing with geosynthetic soil reinforcement

Two stage construction

Single unit precast barrier and coping

CIP barrier with precast coping

Engineering, Manufacturing and Construction Support Services

No matter where the location, Shaw Technologies has the engineering background and technical expertise to handle any application or environment. We have a growing list of satisfied customers using our systems in varying applications spanning the globe from the U.S., Europe and Asia to Australasia and the Middle East.
