Grant Thornton Albania is the Albanian member firm of Grant Thornton International — one of the world's top five professional services networks, operating across 160+ countries with more than 73,000 professionals. Established in Albania in 2010, Grant Thornton Albania provides audit, tax, advisory, outsourcing, and legal services to the country's largest domestic corporations, international investors, financial institutions, and public sector clients. With deep local expertise and seamless access to Grant Thornton's global network, the firm is the premier gateway for US companies entering the Albanian market and for Albanian businesses seeking to engage with US partners.

Audit & Assurance. Grant Thornton Albania delivers rigorous statutory audit, IFRS/GAAP reporting assurance, internal audit, and compliance reviews — helping clients maintain the highest standards of financial transparency and governance. The firm serves a broad base of private companies, publicly listed entities, banks and financial institutions, and government agencies, applying Grant Thornton's globally consistent audit methodology and quality standards. Independent and technically authoritative, the audit practice is a trusted partner for international investors conducting due diligence on Albanian operations.

Tax Services. The firm's tax practice helps clients manage their Albanian and cross-border tax obligations with transparency, efficiency, and full regulatory compliance. Services span corporate and business tax, international tax structuring (both direct and indirect), transfer pricing documentation, global mobility tax for expatriate employees, private client services, and VAT compliance. Grant Thornton Albania also advises on tax policy and represents clients in tax disputes and negotiations with Albanian tax authorities — a critical capability for international companies operating in a rapidly evolving fiscal environment.

Advisory, Outsourcing & Legal Services. Grant Thornton Albania's advisory team supports clients through transactions (M&A, due diligence, valuations), business restructuring, risk management, ESG and sustainability reporting, and operational efficiency projects. The firm's outsourcing division removes the complexity of back-office compliance for multinational companies — providing fully managed accounting, payroll, and financial reporting services across multiple jurisdictions. Grant Thornton Albania's legal services practice completes the offering with corporate law, contract structuring, and regulatory compliance counsel tailored to foreign investors establishing or growing operations in Albania.

US Connection & International Network. Grant Thornton US is one of the six largest accounting and advisory firms in the United States, and Grant Thornton International's global network provides Albania-based clients with direct access to US accounting, tax, and advisory expertise. Grant Thornton Albania is a Premium Member of AmCham Albania and actively serves US companies operating in Albania as well as Albanian companies seeking to access the US market. The firm regularly hosts awareness conferences and professional education events in partnership with AmCham Albania to elevate accounting and governance standards across the region.
